Fund Information

Strategy: The Crypto Currency Fund is the world's first and only crypto currency trading fund. It employs a variety of strategies in trading crypto currencies to maximize return and minimize risk, including event-driven, arbitrage (timing, exchange, inter-crypto currency, etc.), leverage, cyclic, algorithmic, ichimoku and volatility. While its major focus is on bitcoin, it also trades in "altcoins" (non-bitcoin crypto currencies) as they develop sufficient liquidity.

Implementation: Because crypto currency exchanges work 24/7, the Fund's traders, located in Houston, Rotterdam and Moscow, monitor markets around the clock. The Fund has a dedicated research staff in Shanghai due to the significant impact of Chinese exchanges and investors on bitcoin prices. The Fund's Chief Security Officer is one of the world's leading specialists in tcp/ip communications protocols.

Sector Allocation

CCF has opened accounts on nine exchanges and funded accounts on two of them. Four traders are currently active. Most of the Fund is now actively traded.

Pricing

Bitcoin prices fell once again in January, continuing the trend from that latter half of 2014. BTC has now fallen seven out of the past eight months.

Performance (net of fees)

CCF outperformed Bitcoin by about 4% in both fiat (USD) and crypto (BTC) terms. The Fund's traders are doing better in falling markets, although we expect the trend to reverse fairly soon. We have returned to the 2008-2013 (pre-China) trend line, which is a strong indication of a bottom.
