### Fund Information

**Strategy:** The Crypto Currency Fund is the world's first and only crypto currency trading fund. It employs a variety of strategies in trading crypto currencies to maximize return and minimize risk, including event-driven, arbitrage (timing, exchange, inter-crypto currency, etc.), leverage, cyclic, algorithmic, ichimoku and volatility. While its major focus is on bitcoin, it also trades in "altcoins" (non-bitcoin crypto currencies) as they develop sufficient liquidity.

**Implementation:** Because crypto currency exchanges work 24/7, the Fund's traders, located in Houston, Rotterdam and Moscow, monitor markets around the clock. The Fund has a dedicated research staff in Shanghai due to the significant impact of Chinese exchanges and investors on bitcoin prices. The Fund's Chief Security Officer is one of the world's leading specialists in tcp/ip communications protocols.

### Sector Allocation

CCF has opened accounts on nine exchanges and funded accounts on two of them. Four traders are currently active. Most of the Fund is now actively traded.

### Pricing

Bitcoin prices finally rose in February, for only the second time since last June. It would appear that the BTC price will stabilize just above \$200 – which clearly continues the historical trendline (with the Cyprus and China "bubbles").

### Performance (net of fees)

For the second month in a row, CCF outperformed Bitcoin by about 4% in both fiat (USD) and crypto (BTC) terms. We have totally restructured our trading staff and strategy and are convinced that 2015 will be a much stronger year for CCF.
